

## Goal Kicks

“Build Out Line” (dotted line). On goal kicks, all opponents must retreat beyond the build out line. Opponents may cross the dotted line when player 2 touches the ball.

\*Remember it is always dangerous to pass the ball across the front of your goal. Help the players set up correctly so it become second nature. This is one of the Principles of Play.

When player #2 receives the ball they can either pass down the line to player #3/#4 or they can dribble.

This means player #2 must look up and see if the other team is charging in or holding back.
