

Knock out

Make a large square with cones. All players have a ball. Have the players dribble inside the square keeping their ball close. When the coach says go, the players are supposed to guard their ball while trying to kick someone else's ball out. Once your ball is kicked out of the square you sit out. Last player in the square with their ball wins. Coaches can jump in and help kick balls out if game is moving slow. Coaches can also make the square smaller as players get knocked out.
